EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Glenn E. J. Murphy on June 3, 2005.

2. The application has been amended as follows:

2.1. The Abstract of the Disclosure has been replaced with the following:

29 / --A process for preparing a detergent tablet having two or more regions comprises the steps of: (a) compressing a particulate composition comprising a detergent active component to form a compressed region of the tablet having a recess; (b) delivering to the recess a solution or melt comprising a mixture of at least one detergent active component and a fusible carrier material; and (c) solidifying the solution or melt.--

2.2. The TITLE has been replaced with: PROCESS FOR PREPARING DETERGENT TABLETS HAVING TWO OR MORE REGIONS.

STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The objection to the abstract of the disclosure is withdrawn in view of the present amendment. The objection to the disclosure on pages 29 and 31 and the rejection of claim 41

Art Unit: 1751

under 35 U.S.C. 112, first paragraph are withdrawn in view of Applicants' amendment. The rejection of claims 24, 27-30 and 37 under 35 U.S.C. 112, second paragraph is withdrawn in view of Applicants' amendment and cancellation of claims 24, 27-30. Applicants' cancellation of claims 21-32 also renders moot the obviousness rejection based upon Gladfelter. The provisional obviousness-type double patenting rejection over 09/446,436; 09/446,481; 09/446,579; 09/446,434; and 09/446,578 is rendered moot in view of Applicants' amendment and the abandonment of the first three recited applications. The claims in their present amended forms have overcome the rejections based upon Iwase, the closest prior art of record, because Iwase fails to teach, disclose or suggest a process for preparing a detergent tablet having two or more regions in the manner as those specifically recited. The present claims now require "delivering to the recess a solution or melt comprising a mixture of at least one detergent active component and a fusible carrier material comprising PEG 400 and PEG 1200." Even though Iwase teaches adhesion of capsules to the concave parts of the tablets using polyethylene glycol 1500 as seen in Example 4 and using water-soluble high-moleculars like polyethylene glycol and/or surfactant as adhesive material as taught in paragraph [0030] of the translation, Iwase fails to teach the adhesive material (which corresponds to the fusible carrier) comprising a detergent active like surfactant, PEG 400 and PEG 12000. Inasmuch as there is no motivation, direction or guidance (1) in adding a low molecular weight polyethylene glycol into the adhesive material of Iwase and (2) to pick and choose both PEG 400 and PEG 12000 as the adhesive material or fusible carrier, the present claims are found to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
